

Club Handicap Rankings – April 2013

The list below shows updated personal handicaps for club members who have attended sufficient qualifying events (essentially at least three EM league events in the last two years). The end of 2012 is shown as a reference point; if your score has gone down since then, congratulations – this is evidence that you are improving. If not, then at least you are heading towards a more favourable start time in the next club champs! I have excluded handicap scores based on courses below Light Green. The reason for this is that although I am calculating them, a lot of the younger juniors are in the process of moving up through the courses and consequently their scores are very unstable.

Note: These numbers do have meaning - for example, a member with a handicap score of 0.900 will on average complete each km in 90% of the time of the “average orienteer”, who at the moment is best represented by Judith Holt who has a handicap score of 1.004.
